Order of a MBE research system in Germany

Bezons, October 30, 2017 – 5:45 pm - RIBER, a global market leader for semiconductor industry equipment, is announcing the order of a MBE research system in Germany.

Fraunhofer Institute for Applied Solid State Physics (IAF), Freiburg, a reference in the area of research in Germany, has ordered a MBE 49 system that will be used for electronic applications development based on compound semiconductors.

This new order confirms the widespread market adoption of the MBE 49, one of the most efficient thin film deposition systems.

This order will be delivered in 2018.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
