Order for a MBE production system in China

Bezons, July 12, 2018 - 5:45pm - RIBER, a global market leader for semiconductor industry equipment, is announcing an order for a MBE 6000 production system in China.

Acken Optoelectronics, a Chinese firm specialized in developing dedicated laser systems for very high-speed communications networks, has ordered a RIBER MBE 6000 production system. This MBE system will contribute to the development of new optoelectronic systems serving the Chinese and international markets for 5G, fiber-optic interconnections and data centers.

This latest commercial success in China highlights how RIBER's technological solutions offer an effective response to production requirements for the deployment and distribution of 5G on the Chinese market by 2020.

This order will be delivered in 2019.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
