## Order for a double research MBE machine in Europe

**Bezons, November 18, 2020 – 5:45 pm – RIBER, global market leader in MBE equipment for semiconductor industry, is announcing an order for a research system in Europe for a total amount of several million euros.**

A European customer of RIBER has ordered an MBE 412 research machine, equipped with two growth chambers and one cluster, for the research and development of optoelectronic components based on III-V materials for the automotive industry.

The ordered system will be delivered in 2021.

### **About RIBER**

RIBER is the global market leader in MBE equipment. The company designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to 5G telecommunications networks, OLED screens and next-generation solar cells.

RIBER is a BPI France-approved innovative company and is listed on the Euronext Growth Paris market (ISIN: FR0000075954).
