Order for a production MBE system in Europe

Bezons, February 21, 2018 - 5:45 pm - RIBER, a global market leader for semiconductor industry equipment, announces the order for a production MBE system in Europe.

A new customer for the company has ordered a production MBE system that will be used for the development and manufacture of new microwave components.

These microwave components are set for end-use applications in the transmission and access to 5G telecommunications networks. They also provide production prospects for the civil and industrial Internet of Things.

This order will be delivered in the second half of 2018.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
