## Order of a production MBE system in China

**Bezons, January 23, 2018 - 5:45 pm - RIBER, a global market leader for semiconductor industry equipment, announces the order of a production MBE system from a new Chinese customer.**

This new customer, located in Wuhan Province's "Optical Valley", China's leading provider of optoelectronic device solutions, has ordered a production system to expand its production capabilities for advanced photonic components.

Those photonic components enable the fast increase of the traffic in the optical fiber networks sets for deploying the fiber to home, for consumer access to very high speed internet, as well as for the 4G mobile network.

This order will be delivered in the second half of 2018.

### **About RIBER:**

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
