Production MBE system order in Europe

Bezons, October 9th 2017 – 5:45 pm – RIBER, a global market leader for semiconductor industry equipment, is announcing the order of a production MBE system in Europe.

RIBER has received an order for a MBE 49 production system to increase the manufacturing capacity for advanced photonic components. Those photonic components enable the fast increase of the traffic in the terrestrial and undersea optical fiber networks, set for deploying the fiber to consumer for its access to very high speed internet.

This order will be delivered in 2018.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
