

RIBER

Press release

RIBER received a major order for evaporators

Bezons, August 21, 2017 – 6:00 pm - RIBER, a global market leader for semiconductor industry equipment, has received an order for more than one million euros from a new customer for the supply of evaporators to the photovoltaic industry.

These evaporators will be used in thin film deposition equipment, making it possible to manufacture photovoltaic cells using new materials as compared to existing technologies.

This order will be delivered in 2018.

This commercial success could lead to repeated orders as the customer will ramp up its production capacity in the future.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes.
