Press release

Production machine order in Asia

Bezons, January 18th 2016 – 5:45 pm – RIBER, the global molecular beam epitaxy (MBE) specialist, is announcing an order for a MBE49 Multi wafer production machine.

The MBE system 49 can produce epi-wafers with very high performance level and is particularly suitable for the manufacture of microelectronic and optoelectronic devices.

This fully automated machine enables to operate continuously 24 hours a day, 7 days a week, with rates of uninterrupted use of more than ten months and high level of reliability.

This order, recorded on January 15th, should be delivered before the end of 2016. This confirms the upturn in RIBER's order book.

ABOUT RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and new-generation solar cells.

Riber recorded €16.6 million in revenues for 2014, with 96 employees at the end of 2014. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps. Riber is eligible for SME share-based savings schemes.
