

RIBER

Press release

Two new orders for research systems

Bezons, December 14, 2015 - 7:00am - RIBER, the global molecular beam epitaxy (MBE) specialist, is announcing that it has signed two orders for research machines.

MBE 412 system order in Germany

The Fraunhofer HHI (Heinrich Hertz Institute), one of the world's leading research institutes for mobile and stationary communication networks, has just ordered a gas source MBE 412 system which is one of the market's best performing thin-film deposition systems.

The system will be used for Terahertz photonics applications. The MBE 412 has been chosen for its high level of flexibility, its reliability and its capacity to produce extremely complex and very high-quality semiconductor materials on large-format substrates on a reproducible basis from gas and solid sources.

The system MBE 412 will be delivered to Fraunhofer HHI in 2016.

Compact 21 system order in USA

RIBER has also sold a Compact 21 MBE machine to a leading laboratory in USA, which will help expand its research capabilities for new GaN structures.

This order, recorded in November, will be delivered in 2016.

ABOUT RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-technology equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and new-generation solar cells.

Riber recorded €16.6 million in revenues for 2014, with 96 employees at the end of 2014. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps. Riber is eligible for SME share-based savings schemes.
