Press release

Research MBE system ordered in France

Bezons, September 28th, 2015 – 7:00 am – RIBER, the global specialist for molecular beam epitaxy (MBE), is announcing an order for a research MBE system with IPVF (Institut Photovoltaïque d'Ile-de-France).

Delivered in 2015, this research system will be IPVF's first MBE equipment.

IPVF is a partnership between public and private interests and is accredited under the French label of "Institute for Energy Transition", focusing on photovoltaic research. This new MBE system will strengthen IPVF's capabilities in the field of high efficiency solar cells.

The Compact 21 system was chosen for its flexibility and its ability to develop complex and high quality materials.

This new sale to a leading laboratory confirms RIBER's strong positions on the MBE research market.

ABOUT RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and new-generation solar cells.

Riber recorded €16.6 million in revenues for 2014, with 96 employees at the end of 2014. The company is ISO9001 certified. Riber is listed on NYSE-Euronext Paris, Compartment "C", and is part of the CAC Small, CAC Mid & Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is one of the best-rated companies in the Gaïa-index, the leading SRI index for French mid-caps. Riber is eligible for SME share-based savings schemes.
