Major order for MBE services in the United States

Bezons, September 4, 2020 - 8:00 a.m. - RIBER, a global market leader for semiconductor industry equipment, is announcing a major services order for more than one million euros from a US industrial customer.

This order concerns the full refurbishment of a production system in order to modernize its functions and components. This upgrade will enable the system to be used for new applications.

This order will be delivered during the first half of 2021.

About RIBER

RIBER is a global market leader for semiconductor industry equipment. It designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to 5G telecommunications networks, OLED screens and next-generation solar cells.

RIBER is a BPI France-approved innovative company. The Company is listed on the market Euronext Growth Paris (ISIN: FR0000075954).
